Product Overview

Double-Edged Jab Saw

This versatile 6.5-inch jab saw is engineered for precision and efficiency in general construction and renovation tasks. Featuring a high-carbon steel blade with a double-edged design, it allows for faster cutting in both directions, making it an essential tool for plunge cuts. With an ergonomic, rubber-overmolded handle, this saw provides the comfort and control required for demanding work on drywall, wood, plastic, and pipe.

Technical Specifications

Blade Length	16.5 cm
Blade Material	High carbon steel
Teeth Per Inch	7 TPI
