

Double Faced Mallet Hammer with Interchangeable Rubber and Plastic Heads

This double-faced mallet hammer features a durable wooden handle and two interchangeable heads: one rubber and one plastic. It is designed for applications where a softer strike is needed to prevent damage to the workpiece.

Product Overview

Versatile Striking Tool

This double-faced mallet hammer is designed for precision tasks where surface protection is paramount. Featuring a durable wooden handle and a secure metal collar, it offers reliable performance for delicate assembly work. The interchangeable head system allows users to switch between a non-marring black rubber face and a firmer yellow plastic face, making it an essential tool for woodworking, jewelry making, and general crafting.
