Product Overview

Versatile Cutting Performance

The Double Flute Straight Router Bit is a highly popular tool essential for general-purpose routing tasks, including the creation of dadoes and rabbets. Engineered for versatility, it delivers efficient material removal and clean finish quality across a wide range of materials. Its design strikes an ideal balance between cutting speed and precision, making it a reliable choice for professional woodworking applications.

Application & Compatibility

Common Applications

- Dadoes
- Rabbets
- General Purpose Routing
- Grooving

Compatible Materials

Solid Wood, Plywood, Plastics, Laminated Material

Technical Specifications

Design Features

Double Flute • Straight Cutting Edge

Usage Recommendation

For optimal results and tool longevity, always select the shortest cutting length (H) required for the specific work to be performed.
