

# Double Gang Rocker Switch

This double gang switch enables control of two separate circuits. It features a flush-mounted design with individual rocker switches, suitable for lighting and appliance control in homes and businesses.

## Product Overview

### Double Gang Rocker Switch

This double gang rocker switch is designed to provide efficient control over two separate electrical circuits from a single, centralized location. Featuring a durable plastic frame and a sleek coverplate, it offers a reliable solution for both residential and commercial lighting or appliance management. The standard 86x86mm dimensions and straightforward screw-fix installation make it a versatile choice for various interior setups.
