

Double Girder Bridge Crane 5T-1000T

This double girder bridge crane is suitable for indoor or outdoor fixed cross intercropping handling and transport work. It has a lifting capacity range of 5T-1000T, with working-level options of A3, A5, and A6.

Overview

Robust Industrial Lifting Solution

This Double Girder Overhead Crane is engineered for heavy-duty material handling in both indoor and outdoor environments. With a versatile lifting capacity ranging from 5T to 1000T, it provides a secure and powerful solution for factories, mines, and warehouses. The system features a robust double girder bridge mechanism, trolley with frame, and advanced electrical components for reliable operation.

Performance Specifications

Lifting Capacity Range

5 T

Minimum Capacity

1000 T

Maximum Capacity

Working Levels

A3, A5, A6

Technical Details

Operation Modes

- Ground operation
- Remote operation
- Driver's cabin

Speed Control Options

Fixed Speed • VVVF Inverter Type

Application Guide

Working Level Applications

Working Level	Typical Application
A3	Power plant maintenance / Infrequent use
A5	Factories, mines, workshops, warehouses
A6	Heavy-duty / Frequently used environments
