

Double Head Hinge Boring Machine

This double-head hinge boring machine is designed for efficient and precise drilling of hinge holes in woodworking applications. It features two independently adjustable drilling heads, allowing for simultaneous boring of multiple holes, increasing productivity.

Overview

High-Efficiency Hinge Boring Solution

This double-head hinge boring machine is specifically engineered for efficient and precise drilling of hinge holes in professional woodworking applications. Featuring two independently adjustable drilling heads, it enables the simultaneous boring of multiple holes to significantly boost productivity. With a robust frame, precision table, and pneumatic clamping system, it ensures stable, accurate, and secure operation for high-volume furniture and cabinet manufacturing.

Technical Specifications

Drilling Heads	2 heads
Clamping Type	Pneumatic

Features

Best For

- Furniture Manufacturing
- Cabinet Making
- High-Volume Hinge Installation

Key Features	Independently Adjustable Heads, Pneumatic Clamping, Precision Table, Emergency Stop, Protective Guards
