

Double Head Push Button Switch 220V 10A

This double head push button switch is designed for on/off control. It is rated for 220V and 10A, suitable for use in various electrical power applications.

Product Overview

Specializing in production of buttons and indicators since 1997

Double-headed design allows for independent control of two separate circuits, ideal for control panels.

Industrial Double Head Push Button Switch

This double-headed push button switch is designed for reliable ON/OFF control in industrial electrical systems. Featuring a durable construction of zinc alloy and high-grade anti-flam plastic, it ensures safety and longevity in demanding environments. The unit is rated for 10A and is compatible with circuits up to 600V, making it an ideal choice for control panels, distribution cabinets, and machinery automation.

Electrical Specifications

Rated Insulation Voltage	AC 600V
Conventional Heating Current	10 A
Insulation Resistance	e5M©
Contact Resistance	d25h©

Performance & Durability

Ingress Protection

Component	Rating
Green Button (NO)	IP40
Red Button (NC)	IP65

Mechanical Life 1000000

Electrical Life 500000
