

Double Headed Box Cutter

This double headed box cutter features a durable housing and two steel rods extending from the body. One rod has a chisel tip and the other has a smooth, rounded tip, allowing for efficient cutting of double-layered cardboard boxes.

Product Overview

Double Headed Box Cutter

This double-headed box cutter is engineered for efficiency in warehouse and logistics environments. Featuring a durable black rectangular housing, it provides a stable grip for consistent performance. The tool is equipped with two distinct steel rods—one chisel-tipped and one rounded—specifically designed to handle double-layered cardboard boxes with precision.
