

Double Hook Safety Lanyard with Energy Absorber

This double hook rope lanyard is designed for fall protection in various work environments. It features two large, self-locking snap hooks for secure attachment to anchor points and includes an energy absorber to reduce impact force.

Product Overview

Professional Fall Protection

This double hook safety lanyard is engineered for reliable fall protection in demanding work environments such as construction and maintenance. Equipped with an integrated energy absorber, it effectively reduces impact forces during a fall event. The system features a robust design with high-strength components to ensure worker safety and compliance with industry standards.
