

Double Infrared Cooktop with Digital Controls

This double infrared cooktop provides two independent heating zones for versatile cooking. Each zone features a digital display, adjustable timer, and safety features like overheat protection and a hot surface indicator.

Product Overview

Professional Double Infrared Cooktop

This double infrared cooktop offers a compact and efficient solution for professional kitchen spaces or commercial countertop applications. Designed with a sleek, easy-to-clean surface, it features independent digital controls for each heating zone to allow for precise temperature management. Enhanced safety features include child locks, overheat protection, and a clear hot surface warning indicator for reliable daily operation.
