

Double Layer High Speed Cable Reel

These cable reels offer good rigidity and dynamic balance. The concentric design ensures high performance during winding and unwinding operations.

Product Overview

High-Performance Cable Spooling Solutions

This range of high-speed cable reels is engineered for demanding industrial wire and cable manufacturing processes. Available in multiple configurations including corrugated steel, double-layer, and flat designs, these spools ensure reliable performance during stranding, bunching, and drawing operations. Built for durability and precision, these reels provide secure storage and efficient handling for a variety of cable and wire types.

Technical Specifications

Double Layer High Speed Spool Sizes

- PND500mm
- PND630mm
- PND800mm
- PND1000mm
- PND1250mm

Flat High Speed Spool Sizes

- PND300mm
- PND400mm
- PND500mm
- PND630mm
- PND800mm
- PND1000mm
- PND1250mm

Corrugated Steel Spool Sizes

- PN1000mm
- PN1250mm
- PN1400mm
- PN1600mm
- PN1800mm
- PN2000mm
- PN2240mm
- PN2400mm
- PN2800mm
- PND3150mm

Applications

Compatible Machinery	Stranding Machine, Twist Bunching Machine, Taping Machine, Wire Drawing Machine, Annealing Machine, Enameling Machine, Tinning Machine
Suitable Materials & Processes	Large Cable, Welding Wire, Copper Wire, Aluminum Wire, PVC Tube, PVC Pipe Rolling
