

Double Rocker Light Switch

This double light switch features two white rocker buttons set in a rectangular frame. It is designed for easy installation and reliable operation for controlling lighting circuits.

Product Overview

Modern Double Rocker Switch

This double rocker light switch features a clean, modern design suitable for both residential and commercial applications. With two horizontally aligned rocker buttons, it offers reliable and intuitive control for two separate lighting circuits. The unit is engineered for easy installation, making it an ideal choice for professional electrical upgrades and new construction projects.
