

Double Spindle Multi-Purpose Machine Tool

The double spindle multi-purpose machine tool is designed for a range of machining tasks. Featuring dual spindles and a multi-axis worktable, it facilitates efficient and precise machining on various materials.

Overview

Versatile Machining Capability

The ZXSM-45 is a robust double multi-purpose machine tool engineered for high-efficiency machining operations. Featuring dual spindles, it allows for simultaneous or sequential processing, significantly boosting productivity. Its multi-axis worktable provides exceptional flexibility for positioning and machining complex parts with precision.

Key Features

Operational Features

- Dual spindle configuration
- Multi-axis worktable
- Intuitive control panel
- Robust construction for stability

Machining Capabilities

Drilling, Tapping, Milling

Performance Metrics

Performance Summary

2 units

Spindle Count
