Product Overview

High-Performance Concrete Pump Elbows

These double-wall concrete pump elbows are engineered for durability and efficient material transfer in demanding construction environments. Featuring a high-chromium cast inner wall, the two-layer wear-resistant design significantly extends service life compared to standard components. They are precision-engineered to withstand high pressure and abrasive materials, making them an ideal choice for truck-mounted pumps and various concrete machinery applications.

Technical Specifications

Construction

Double Wall • Two-Layer

Available Angles

- 9 Degree
- 90 Degree

Inner Wall Material

High Chromium Cast

Available Sizes

3 inch, 4 inch, 5 inch

Compatibility

Compatible Machine Brands

- Putzmeister
- Junjin
- Sany
- Kyokuto
- Zoomlion

Application

Truck-mounted concrete pumps and general concrete machinery
