

Double-Wheel Soil Tillage Machine

This double-wheel soil tillage machine is designed for efficient soil preparation. It features a double-wheel drive system and adjustable tillage depth, making it suitable for small to medium-sized farms.

Overview

Efficient Soil Preparation

This double-wheel soil tillage machine is engineered for efficient and effective soil preparation in agricultural environments. It features a robust engine combined with a double-wheel drive system, providing enhanced traction and stability during operation. With adjustable tillage depth and durable tilling blades, it is designed to break up and aerate soil, ensuring optimal seedbed preparation for small to medium-sized farms.

Core Features

- Robust engine
- Durable tilling blades
- User-friendly controls
- Compact design

Drive System	Double-wheel drive
Adjustable Features	Adjustable Tillage Depth
Target Use Case	Small to medium-sized farms
