Product Overview

Precision Dovetail Table Vise

This dovetail table vise is a versatile tool engineered for securely holding workpieces during machining and woodworking operations. Constructed from high-quality grey cast iron, it features hardened steel jaws with a specialized dovetail design for precise alignment and clamping. The unit includes a 360-degree swivel base for flexible positioning and is designed for stable mounting on workbenches.

Construction & Design

Material	Grey cast iron
Anvil Options	Round Anvil, Square Anvil
Jaw Design	Dovetail design

Features

Swivel Base	Yes
Rotation Angle	360 degrees

Applications

Recommended Applications

- Machining operations
- Woodworking
- Metalworking
- Precision workholding
