

Down The Hole (DTH) Hammer

These Down The Hole (DTH) hammers are engineered for efficient rock drilling. They are compatible with DHD340, COP34, SD4, QL40, M40, COP54, QL50, COP64 and QL80 shanks.

Product Overview

High-Performance DTH Hammer

These Down The Hole (DTH) hammers are engineered for efficient rock drilling across diverse mining and construction applications. Designed to optimize energy transfer and penetration rates, they ensure reliable performance even in demanding, abrasive environments. The simplified, robust construction reduces maintenance needs while delivering consistent, high-speed drilling results.

Technical Specifications

Compatible Shank Styles

- DHD3.5, DHD340, DHD350, DHD360, DHD380
- COP44, COP54, COP64, COP84
- TD40, QL50, QL60, QL80
- Mission40, Mission50, Mission60, Mission80
- SD4, SD5, SD6, SD8
- DHD112, SD12, NUMA125

Available Sizes

3 inch, 3.5 inch, 4 inch, 5 inch, 6 inch, 8 inch, 10 inch, 12 inch, 14 inch

Performance Metrics

Performance Advantages

30 %

Increased Drilling Speed

10 %

Reduced Oil Consumption

Key Operational Benefits

No foot valve fracture • Lower energy consumption • Higher impact frequency • Simple structure • Easy maintenance
