Product Overview

High-Efficiency Drain Pump

This B15-6A drain pump is engineered for reliable performance in household kitchen and laundry appliances, such as washing machines and dishwashers. It features a robust construction with a durable impeller and motor assembly, ensuring long-term operational efficiency. Designed for easy installation and quiet operation, this component is an ideal choice for both new appliance manufacturing and maintenance replacements.

Technical Specifications

Performance Features

- Quiet operation
- Efficient water drainage
- Durable impeller and motor assembly
- Easy installation and maintenance

Model Number

B15-6A

Compatible Applications

Washing Machine, Dishwasher, Kitchen Appliances
