Product Overview

HK1010 Drawn Cup Needle Roller Bearing

The HK1010 is a high-precision drawn cup needle roller bearing designed for applications where radial space is limited. Engineered from high-quality bearing steel, it offers excellent durability, high speed capabilities, and reduced friction. This compact bearing provides a robust solution for various industrial conveying and rolling devices.

Key Features

High Quality, Durable, High Speed, Lower Friction

Applications

Suitable Applications

- Agriculture
- Light textile
- Mining
- Food & beverage
- Pharmaceutical
- Chemical processing
- Printing
- Dyeing
- Airport equipment
- Air-conditioning
- Conveying and rolling devices
