

Drill Bit for Petrochemical Applications

This drill bit is designed for demanding applications in petrochemical and petroleum prospecting engineering. It features a durable construction for extended life and precise drilling.

Product Overview

High-Performance Drilling Solution

The Drill FD-A06 is a high-performance drill bit specifically engineered for the demanding requirements of petrochemical and petroleum prospecting engineering. Designed for durability and precision, it ensures extended service life and reliable performance in challenging environments. This tool is optimized for a variety of materials and conditions typically encountered in international engineering contracting projects.

Technical Capabilities

Key Performance Features

- Durable construction for extended tool life
- Precise drilling accuracy
- Engineered for optimal reliability
- Versatile material compatibility

Operational Suitability

High-Performance • Industrial Grade • Heavy Duty

Primary Applications

Petrochemical Engineering, Petroleum Prospecting, Foreign Engineering Projects

Product Identification

Model Number

FD-A06
