

Drill Bit Re-Sharpener Machine

This machine is designed for re-sharpening twist drill bits. It provides accurate and rapid grinding, simplifying the process without requiring specialized skills.

Overview

Precision grinder for professional twist drill bit maintenance.

Professional Drill Bit Re-Sharpener

This portable precision grinder is designed for the accurate and rapid sharpening of twist drill bits. It is engineered to allow users of all skill levels to achieve professional-grade results without requiring specialized expertise. The unit features a powerful DC motor and high-quality diamond grinding wheel, ensuring extended tool life and improved operational efficiency for industrial and workshop environments.

Technical Specifications

Designed for rapid and accurate sharpening without requiring professional skills.

Speed

4800 RPM

Rotation Speed

Model	PG-26D
Grinding Range	12.1mm - 126mm
Point Angle	85°-140°
Voltage	220 V
Power	250 W

Standard Equipment

Standard Model

Grinding Wheel (HSS)*1 Collets*14 Fixture Group *1

Standard equipment package including collets and fixture set.

Package Contents

- 1 x Grinding Wheel (HSS)
- 14 x Precision Collets
- 1 x Fixture Group

Key Features

Capabilities

Precision Sharpening, Adjustable Point Angle, Back Angle Adjustment, Front Cutting Lip Control, Powerful DC Motor
