

Drill Press Machine

The drill press is a machine tool used for drilling holes in metal, wood, or other materials. The spindle is lowered to the workpiece, and the drill bit is rotated to create the hole.

Product Overview

Professional Grade Drill Press Machine

This versatile machine tool is designed for precision drilling across a wide range of workpieces including metal, wood, and composite materials. Featuring a robust construction with a stable base, column, and adjustable table, it ensures accurate hole placement for industrial applications. Available in multiple configurations from 750W to 1500W, these drill presses are suitable for manufacturing, construction, and professional woodworking environments.

Technical Specifications by Model

Model	Drilling Cap.	Motor Power	Spindle Taper	Swing
ZJ4120F	20mm	750W	MT#2	360
ZJQ5125	25mm	750W/900W	MT#3	360
ZJ5125	25mm	1100W/1500W	MT#3	450
ZJQ5132	32mm	1100W/1500W	MT#4	450
ZJ5132	32mm	1100W/1500W	MT#4	510

Physical Construction

Spindle Travel Range

- 85mm for light-duty models
- 120mm for heavy-duty models

Total Height

- 1600mm
- 1710mm

Column Diameter

Æ72, Æ80, Æ92

Logistics & Shipping

20' Container Capacity

- 86 pcs (Heavy models)
- 180 pcs (Standard models)

Net Weight Range

70 kgs to 145 kgs
