

Drilling and Milling Machine

This versatile machine is designed for precision metalworking. It is ideal for drilling, milling, and tapping operations on various materials.

ADDITIONAL IMAGES

Overview

Versatile Precision Machining Solution

This drilling and milling machine is a multi-functional tool designed for precision metalworking, combining drilling, milling, boring, and grinding capabilities. It features a robust construction and variable speed control, making it ideal for processing small and medium-sized parts. With its multi-axis adjustable worktable, the machine ensures accurate positioning for professional machining, prototyping, and educational applications.

Core Capabilities

Machine Functions	Drilling, Milling, Boring, Grinding, Tapping
-------------------	--

Technical Features

Construction

Robust Build • High Reliability

Speed Control

Variable speed control for optimized material processing

Worktable

Multi-axis adjustable for accurate positioning

Applications

Ideal For

- Professional metalworking
- Prototyping
- Educational purposes
- Hobbyist applications

Processing Range

Small and medium-sized parts

Compliance

Certifications

CE
