Product Overview

High-Performance Drilling Rig Travelling Block

This industrial-grade travelling block is engineered for demanding oilfield applications, providing robust hoisting capabilities for drilling rigs. Designed to meet strict international standards, it offers reliable load distribution through a multi-sheave system, ensuring smooth and efficient operation. Its durable construction is finished with a high-visibility coating for enhanced safety and corrosion resistance in harsh environments.

Performance Specifications

Model Capacity Table

Model	Max Hook Load (kN)	Sheaves	Line Diameter (mm)
YC90	900	4	26
YC135	1350	4	26
YC170	1700	5	29
YC225	2250	5	32
YC315	3150	6	35
YC450	4500	6	38
YC585	5850	7	38

Maximum Rated Capacity

5850 kN
Max Hook Load

Compatibility & Features

Compatible Systems

Rotary Tables, Hooks, Crown Blocks, Swivels, F-Series Mud Pumps
