

Drop Forged Ball Pein Hammer

This is a ball pein hammer, also known as a machinist's hammer, used in metalworking. It features a drop forged head and an ergonomic handle with a yellow and black grip.

Overview

Versatile Machining Utility

This professional-grade ball pein hammer is engineered for precision metalworking tasks, including shaping, riveting, and striking. Featuring a high-strength drop forged head, it ensures maximum durability under demanding industrial conditions. The dual-sided design offers both a flat face for driving tools and a rounded face for intricate metal shaping, supported by an ergonomic grip for superior user control.

Technical Specifications

Primary Applications

- Metal shaping
- Riveting
- Striking punches
- Driving chisels

Head Construction	Drop forged steel
Model ID	E10417
Handle Design	Ergonomic, Secure Grip, Two-tone Finish
