Overview

Industrial Drum Handling Solution

The DF20 Drum Trolley is a heavy-duty material handling solution engineered for the safe and efficient transport of standard 55-gallon drums. Constructed from high-strength steel with a high-visibility orange powder coat, it features a specialized four-wheel design and an ergonomic tilting mechanism to reduce physical strain. This mechanical appliance is ideal for industrial, manufacturing, and agricultural environments where frequent drum loading and unloading are required.

Dimensions

Physical Dimensions

Dimension Type	Measurement
Total Length	1476 mm
Total Width	560 mm
Internal Width	412 mm
Height (Tilted)	950 mm
Height (Level)	400 mm

Design & Construction

Wheel Specification

- Four-wheel configuration for maximum stability
- 200mm diameter durable wheels
- 305mm distance between drum support and wheels

Material & Finish

Heavy-duty steel tubing with a bright orange powder coat finish for corrosion resistance.

Safety Features

Integrated Chime Hook, Non-marking Wheels, Ergonomic Handle, Low-profile Loading

Applications

Suitable Environments

Industrial • Manufacturing • Warehousing • Agricultural
