

# Dry Diamond Core Drill Bit

Designed for drilling walls made of brick, block, and lightweight concrete, this core bit allows for dry drilling. Its design ensures efficient dust removal.

## Overview

### High-Performance Dry Drilling Solution

This Dry Diamond Core Drill Bit is engineered for professional drilling in masonry materials like brick, block, and lightweight concrete. Designed specifically for dry operation, it eliminates the need for water cooling while maintaining high efficiency. Its robust construction and specialized dust removal features make it an essential tool for electrical, plumbing, and HVAC installations.

## Key Performance

### Performance Highlights

**0 L**

Water Required

## Technical Design

### Construction Materials

- Robust steel body
- Diamond-tipped cutting segments

### Dust Management

Spiral slots for efficient dust removal and overheating prevention

## Application

### Target Industries

Electrical • Plumbing • HVAC

### Compatible Materials

Brick, Block, Lightweight Concrete, Masonry

## Operational Requirements

### Cooling Method

Dry drilling (No water required)
