

Dry Iron with Non-Stick Soleplate

This dry iron is designed for efficient and effective ironing. It features a non-stick soleplate and a temperature control dial.

Product Overview

High-Efficiency Dry Ironing Solution

The DJ-D517 is a versatile dry iron designed for professional and domestic garment care, featuring a high-performance soleplate available in non-stick, stainless steel, or ceramic finishes. With a powerful output of up to 1200W and precise temperature control, it effectively handles various fabric types from delicate silk to heavy linen. Its ergonomic design and generous cord length ensure ease of use and maneuverability for high-volume ironing tasks.
