

DTH Drilling Excavator

This drilling excavator is construction machinery designed for drilling operations. Its hydraulic system powers the drilling mechanism and arm movements, providing efficient drilling on various terrains.

Overview

JLZ80 DTH Drilling Excavator

The JLZ80 DTH drilling excavator is a high-performance construction machine engineered for demanding drilling operations. Built on a robust excavator chassis, it integrates a powerful drilling mast and hydraulic arm to deliver efficient and precise performance in challenging environments. This versatile unit is well-suited for mining, geotechnical exploration, and major construction projects, offering excellent mobility via its track-based system.

Technical Specifications

Key Features

- Robust excavator chassis
- Mounted drilling mast
- Advanced hydraulic arm system
- Track-based mobility
- Operator-controlled cabin

Model	JLZ80
Primary Applications	Construction, Mining, Geotechnical
