

Dual 12-inch Powered Multimedia Speaker System with FM, USB, SD, and Karaoke

This multimedia speaker system is designed for stage or home use. It features dual 12-inch woofers, FM radio, USB/SD card reader, equalizer, and karaoke function.

Product Overview

Multimedia Speaker System

This dual-speaker multimedia system is designed for immersive audio performance, featuring a dedicated bass-heavy sound box for enhanced low-frequency output. The system supports versatile playback options including FM radio, USB, and SD card inputs, making it suitable for various multimedia setups. With integrated karaoke functionality, it provides a complete audio solution for both entertainment and professional presentation needs.

Technical Specifications

Speaker Configuration	2.1 Channel System

Features

Key Features

Karaoke Ready • Powered System • Bass Adjustment • Treble Adjustment

Placement Guidelines

Setup Recommendations

- Place subwoofers on the ground for optimal stability.
- Maintain a 5-10cm distance between the inverted phase hole and walls to enhance bass.
- Align speakers with the user's ear level for the best acoustic experience.
- Ensure the distance between the user and speakers does not exceed 1.5 meters for near-field monitoring.
