

Dual 12V/24V DC Cigarette Lighter Socket Adapter

This adapter features two standard cigarette lighter sockets for powering multiple devices at once. It is equipped with wiring for connection to a power source and includes protective caps for dust and moisture prevention.

Product Overview

Versatile Power Solution

This dual cigarette lighter socket adapter is engineered for reliable power distribution in automotive and marine environments. It supports both 12V and 24V DC systems, allowing for the simultaneous operation of multiple electronic devices. With its durable design and protective caps, it ensures consistent performance while guarding against dust and moisture ingress.

Technical Specifications

Input Voltage

12 V

Min Voltage

24 V

Max Voltage

Power Type	DC
Number of Sockets	2

Features

Protection Features

Dust Proof • Moisture Resistant

Application Areas	Automotive, Marine
-------------------	--------------------

Installation

Connection Method	Hardwired
