

Dual 15" Two-Way Passive Speaker

The two-way dual 15" passive speaker is a high-performance solution for sound reinforcement. It provides a complete sound system capable of low-end support or full-range audio reproduction.

Overview

Professional Sound Reinforcement

This high-power, two-way passive loudspeaker system is engineered for demanding professional audio environments. Featuring dual 15-inch low-frequency drivers paired with a 1.5-inch compression driver, it delivers exceptional clarity and high output levels. Built for durability and versatility, the enclosure utilizes high-quality plywood finished with a rugged black coating, making it an ideal choice for live performance venues, dance clubs, and mobile DJ systems.
