Product Overview

Professional Dual Action Polisher

Designed for automotive detailing, this dual action polisher provides efficient, swirl-free results for professional paint correction. It features a robust 1000W motor and variable speed control, making it a versatile tool for various polishing applications. With precision-engineered components and a random orbital motion, it minimizes the risk of holograms and paint damage, ensuring a high-quality finish.

Performance Metrics

Rated Input Power

1000 W

Rated Input Power

No-load Speed

1800 - 4800 RPM

Eccentric Distance

12 mm

Technical Specifications

Voltage Compatibility

- 110V/60Hz
- 230V/50Hz

Compatible Disc Size

125 - 150 mm

Construction Material

20CRMNTI alloy steel components

Compliance & Standards

Certifications

CE • EMC • SGS • RoHS

Polisher Type

Dual Action, Random Orbital
