Product Overview

Dual Action Surface Polisher

Designed for professionals, this dual action polisher offers versatile performance for automotive detailing, paint correction, and surface refinement. Built with high-precision CNC components and integrated shaft technology, it ensures durability and consistent results. The tool features advanced heat dissipation and soft-start technology to provide a smooth, controlled user experience for long-term operation.

Technical Specifications

Available Eccentricity

- 8
- 12
- 15
- 21

Rated Input Power	1000 W
No-load Speed	1800-4800 /min
Disc Size	125-150mm
Power Supply	110V/60Hz, 230V/50Hz

Features & Construction

Core Components

- 20CRMNTI material construction
- Integrated shaft and teeth design
- CNC machined gearbox
- Imported bearings

Ergonomic Features

- Multi-position D handle
- Fish scale antiskid rubber grip
- Infinitely variable speed dial

Operational Technology

- Soft start technology
- High-efficiency heat dissipation
- Replaceable carbon brushes

Certifications

Standards & Compliance

CE • EMC • SGS • RoHS
