

Dual Action Switch Grip Pliers

Dual action switch grip pliers are designed for precision cutting and gripping tasks. They feature a dual-action mechanism that provides increased leverage and control.

Product Overview

Precision Dual Action Pliers

These dual action switch grip pliers are engineered for high-precision cutting and gripping applications. The specialized dual-action mechanism significantly increases leverage and control, allowing for superior accuracy during delicate tasks. Designed with ergonomic handles to minimize hand fatigue, these tools are built from high-quality steel to ensure long-lasting durability in professional environments.

Key Features

Design Benefits

- Dual-action mechanism for increased leverage
- Ergonomic handle design for reduced fatigue
- High-quality steel construction

Suitable Applications

Electronics Assembly, Jewelry Making, Precision Work

Technical Details

Tool Type

Switch Grip • Precision Pliers

Material

High-quality steel
