

Dual-Arm LED Street Lighting Stem

This street lighting stem features a dual-arm design for mounting luminaires. It is constructed from durable materials suitable for outdoor environments, providing efficient illumination.

Product Overview

Dual-Arm LED Street Lighting Solution

This dual-arm LED street lighting stem is engineered for high-performance illumination in outdoor environments, such as roadways and public spaces. Its modern design integrates advanced LED luminaires with a robust, durable construction to ensure long-lasting reliability. The dual-arm configuration provides efficient light distribution, making it an ideal choice for municipal and commercial infrastructure projects.

Technical Specifications

Design Configuration	Dual-Arm
Light Source	LED
Primary Applications	Roadway Lighting, Public Spaces, Outdoor Infrastructure
