

Dual Band 300Mbps Wireless Gigabit Router

This dual-band wireless gigabit router is designed for home and small office networks. It supports the 802.11n standard, delivering wireless speeds up to 300Mbps and features gigabit Ethernet ports for fast wired connections.

Product Overview

High-Performance Networking Solution

This dual-band wireless N gigabit router is engineered for reliable connectivity in home and small office environments. It supports the 802.11n standard, providing wireless speeds up to 300Mbps to handle bandwidth-intensive tasks like HD video streaming and large file transfers. With integrated gigabit Ethernet ports, it ensures fast, stable wired connections alongside robust network security protocols.
