Overview

High-Performance Networking Solution

The AC1200 Dual-Band Gigabit Wireless Router is designed to provide fast and reliable connectivity for both home and small office environments. Utilizing the 802.11ac standard, it delivers combined speeds of up to 1200 Mbps across dual-band frequencies, ensuring stable performance for bandwidth-intensive tasks like HD streaming and online gaming. With advanced features such as MU-MIMO and Beamforming technology, this router optimizes network efficiency and extends coverage for multiple connected users.
