

Dual Centrifugal Blower Fan Assembly

This dual centrifugal fan assembly is designed for ventilation or air handling applications. It features two squirrel cage blowers mounted on a common shaft and housed in metal casings with rectangular outlets.

Product Overview

Dual Centrifugal Blower Fan Assembly

This dual centrifugal blower fan assembly is engineered for high-performance air handling and ventilation in industrial and commercial environments. Featuring two squirrel cage blowers mounted on a common shaft, the unit is designed to deliver consistent, high-volume airflow at moderate static pressure. Its robust metal construction ensures durability and reliability for demanding ventilation applications.

Technical Specifications

Airflow Performance

High Volume • Moderate Static Pressure

Design Type	Dual Centrifugal (Squirrel Cage)
Construction Material	Industrial-grade metal casing
Ideal Applications	Industrial Ventilation, Commercial Air Handling, HVAC Systems
