

Dual-Channel Audio Amplifier

Professional audio amplifier designed for high-performance sound reinforcement. It delivers clear and powerful audio reproduction suitable for live performances, public address systems, and studio monitoring.

Overview

Professional Dual-Channel Audio Amplifier

This professional audio amplifier is engineered for high-performance sound reinforcement in demanding environments. It features dual-channel operation with independent gain controls for each channel, ensuring precise audio management. Equipped with comprehensive protection circuitry and a robust power supply, this unit delivers reliable, clear, and powerful audio reproduction suitable for live performances, public address systems, and studio monitoring.

Technical Specifications

Channel Configuration	Dual-Channel
Model Identifier	AC-675

Features

Control Features

- Independent gain control for Channel A
- Independent gain control for Channel B
- Comprehensive protection circuitry

Compliance	CE
