

Dual Channel VHF Wireless Microphone System

This wireless microphone system features a dual channel receiver with individual volume controls. It is ideal for karaoke, public address, and stage performances.

Overview

Professional Wireless Audio Performance

This dual-channel VHF wireless microphone system is engineered for clear and reliable audio reproduction in various professional settings. Designed with a high signal-to-noise ratio and anti-interference technology, it minimizes background noise while maintaining vocal clarity. The tabletop receiver includes individual volume controls for each channel, providing operators with precise sound management for public address, karaoke, or stage performances.
