

Dual Channel Wireless Handheld Microphone System

This is a professional-grade wireless microphone system with two handheld microphones and a compact receiver. It is suitable for vocal performances, presentations, and karaoke setups.

Product Overview

Versatile Dual-Channel Wireless System

This professional-grade wireless handheld microphone system is designed for reliability and clear audio transmission. Housed in a durable aluminum metal case, the compact receiver ensures portability for diverse professional setups. It offers stable performance with a broad frequency response, making it ideal for vocal performances, public speaking, and event hosting.

Technical Specifications

Bandwidth	50 MHz
Frequency Response	50Hz-15KHz
Signal to Noise Ratio	95 dB
Maximum Offset Frequency	48 KHz

Operational Details

Operating Distance	30 m
Operating Voltage	3.7 V
Operating Temperature	-10°C to 50°C

Build & Design

Housing Material	Aluminum, Metal Case
Modulation Method	Digital modulation
