Product Overview

System Overview

The U-8800 is a high-performance dual-channel wireless microphone system engineered for professional audio reliability. Utilizing UHF frequency modulation, the system ensures stable transmission across a broad coverage range of up to 250 meters. It is designed with professional ergonomics in mind, providing clear signal reception and ease of use in diverse sound reinforcement environments.

Performance Metrics

Key Performance Indicators

250 m Coverage Range	105 dB S/N Ratio	3 W Rated Power
--------------------------------	----------------------------	---------------------------

Frequency Response	40Hz-18KHz
Frequency Stability	±0.005%
Total Harmonic Distortion (T.H.D)	0.5 %

System Connectivity

Receiver Interface

- Antenna Input A
- Antenna Input B
- AF Output A
- AF Output B
- Mix Output
- DC 12V/1000mA Power Input

Technical Standards

Operating Temperature	-10 to +50°C
-----------------------	--------------

Power and Accessories

Microphone Power	2x 1.5V AA Alkaline Batteries
------------------	-------------------------------
