

Dual-Channel Wireless Microphone System with Handheld, Bodypack, Headset, and Lavalier Mics

This dual-channel wireless microphone system is designed for professional audio applications. It features individual channel controls, a digital display, and operates on UHF frequencies for clear transmission.

System Overview

Professional Dual-Channel Audio Solution

The SN-U90 is a versatile dual-channel wireless microphone system engineered for professional audio environments. Featuring both handheld and bodypack transmitter options with headset and lavalier accessories, it offers exceptional flexibility for presentations, public speaking, and stage performances. The system utilizes UHF frequency transmission to ensure clear, stable audio quality and reliable signal reception across both independent channels.
