System Overview

Professional Wireless Audio Performance

The Dual Channel Wireless Microphone System is engineered for reliable vocal and speech transmission in professional environments. Featuring advanced IR synchronization and PLL technology, it ensures seamless frequency matching across 200 available channels. The system includes two robust metal handheld microphones designed for durability and consistent sound quality over a 60-meter operating range.

Technical Specifications

Frequency Range	620-950MHz
Frequency Response	80 Hz-18KHz
Operating Range	60 m
Available Channels	200

Hardware

Microphone Construction

Dual Handheld • Metal Chassis

Power Requirements	1.5V x 2 per unit
Core Technologies	UHF, IR Sync, PLL
