

Dual-Channel Wireless Microphone System with LCD

This is a dual-channel professional wireless microphone system with 200 channels. It features sync IR and PLL.

Product Overview

Professional Dual-Channel Wireless Performance

The PU-2887 is a robust dual-channel wireless microphone system engineered for professional audio environments, including live performances and presentations. It utilizes advanced UHF frequency technology and PLL synthesis to ensure stable signal transmission across 200 selectable channels. With its clear liquid crystal display, users can easily monitor frequencies and navigate system settings for optimal audio control.

Technical Specifications

Frequency Range	620-950MHz
Frequency Response	80Hz-18KHz
Operating Range	60 m

System Features

Key Features

Sync IR • PLL Technology • Liquid Crystal Display

Total Channels	200
Microphone Construction	2 Metal Handheld Microphones, Dual-Channel Receiver

Power & Connectivity

Power Requirements	1.5V x 2 (per microphone)
