

Dual Cup Suction Lifter for Glass and Tile

This double cup suction lifter is designed for lifting and moving flat surfaces such as glass and tiles. It features two heavy-duty suction cups for a secure grip and a durable handle for easy operation.

Product Overview

Professional Dual Cup Suction Lifter

This dual cup suction lifter is designed for the safe and efficient handling of flat, non-porous surfaces such as glass, tiles, and smooth stone. Featuring two high-performance suction pads, it provides a reliable grip to reduce the risk of damage during manual transport. The ergonomic plastic handle ensures comfortable operation for both professional contractors and DIY users alike.
