

Dual-Fixture Roadway Light Pole

This light pole features two light fixtures at different heights for efficient illumination. It is constructed from durable materials to withstand outdoor conditions, enhancing safety and visibility on roadways.

Product Overview

Dual-Fixture Roadway Lighting Solution

This dual-fixture roadway light pole is engineered for versatile outdoor illumination, featuring a unique design with two light fixtures mounted at different heights. The upper fixture utilizes a curved arm for extended reach, while the lower fixture offers direct, focused lighting. Constructed from durable, weather-resistant materials, this pole is an ideal choice for enhancing safety and visibility in street lighting, parking areas, and public infrastructure projects.
