

Dual-Function Torch and Flashlight

This compact lighting solution combines a primary torch with a circular light and a secondary flashlight with a directional button. It is designed for versatile illumination needs in various handheld lighting applications.

Product Overview

Versatile Illumination Solution

This dual-function device serves as both a primary torch and a secondary flashlight, offering exceptional versatility for professional and industrial use. Its compact, portable design ensures easy handling in diverse environments, while the combination of a circular light element and directional button interface provides tailored lighting control. It is an ideal tool for professionals needing reliable handheld illumination in a variety of challenging applications.
