

Dual Grit Sharpening Stone

This sharpening stone features two different grit surfaces, allowing for both coarse and fine sharpening. It is constructed from durable abrasive material ensuring long-lasting performance for various applications.

Product Overview

Dual-Sided Sharpening Solution

This dual-grit sharpening stone is designed for versatile maintenance of knives, tools, and various cutting implements. Featuring a combination of two distinct grit surfaces, it allows for efficient material removal and edge refinement in a single tool. Constructed from durable silicon carbide oxide, this stone provides a reliable sharpening experience for professional and workshop use.
